FOUR RADIO STATIONS NOW AIRING MSOE'S SOUNDS OF SCIENCE

"Sounds of Science," MSOE's public service radio program, is now carried throughout the state by four different radio stations.

The program - aired over Station WISN in Milwaukee for the past nine months - has been "picked up" by Stations WLIP in Kenosha, WKBH in La Crosse, and WSAU in Wausau, giving the school broad, state-wide coverage.

"Sounds of Science consists of five-minute discussions by MSOE instructors designed to keep the public abreast of our country's scientific developments. WISN broadcasts tapes of the program at 12:25 and 8:25 p.m. Saturday and 8:25 p.m. Sunday.
